

E-RICKSHAW BATTERY

INTRODUCTION

Enov E-rickshaw Lithium Batteries provide sustainable mobility solutions for urban transport. With capacities from 45Ah to 180Ah (48V – 72V), they offer 60 – 220 km range per charge and fast charging (3 – 6 hours). Designed for low-speed electric vehicles like rickshaws and golf carts.

- 1) Brand new automotive grade battery core, full capacity and full volume.
- 2) SMH Anderson interface, high-current special connection, high temperature resistant material.
- 3) Waterproof sealing.
BMS protection.
- 4) Two, three and four-wheeled universal models.
- 5) Auxiliary functions: GPS, data monitoring can be added.

MODELS

Model	Voltage(V)	Capacity(Ah)	Cruising Range(KM)	Size(L*W*H)±2mm
EN48-T45	48	45	60-70	310*260*200
EN48-T50	48	50	75	350*225*180
EN48-T60	48	60	80	310*260*200
EN48-T75	48	75	95	340*225*195
EN48-T100	48	100	120	350*225*180
EN48-T160	48	160	180	450*230*180
EN60-T45	60	45	60-70	310*260*200
EN60-T130	60	130	180	500*260*230
EN60-T150	60	150	200	580*270*200
EN60-T180	60	180	220	650*260*245
EN72-T106	72	106	140	520*380*185
